

Quick start

From the box to your first glass.

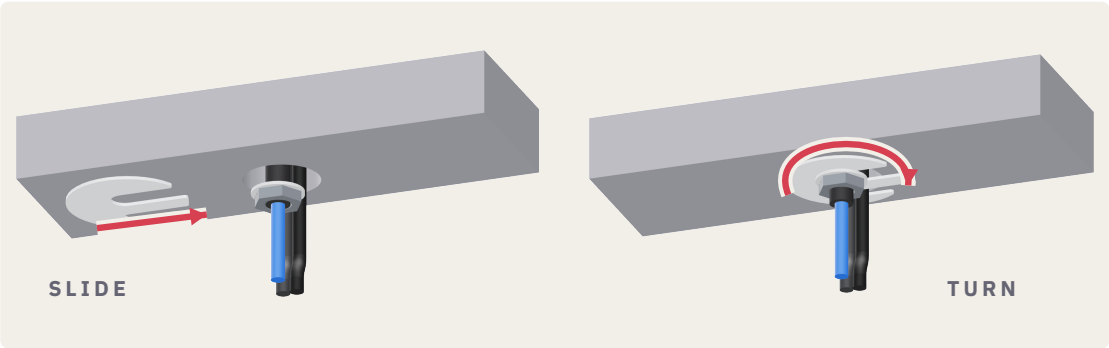

MOUNT THE FAUCET

1 Lower and seat the faucet

Feed the attached tubes and cable through the hole. Lower the faucet, then **push it back** until the two black tubes rest against the back of the hole.

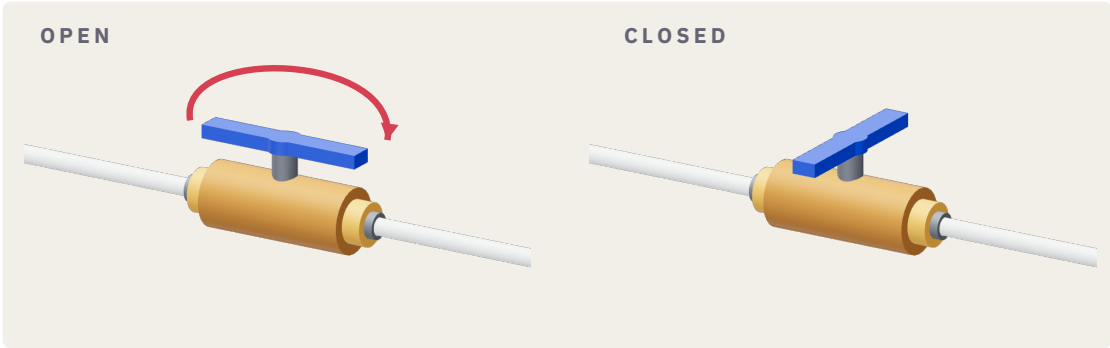

2 Slide the plate. Hand-tighten.

From below, slide the steel plate **above the washer and nut**. Wide slot around the shank; narrow slot around the black tubes. Run the nut up by hand.

CONNECT THE COLD WATER

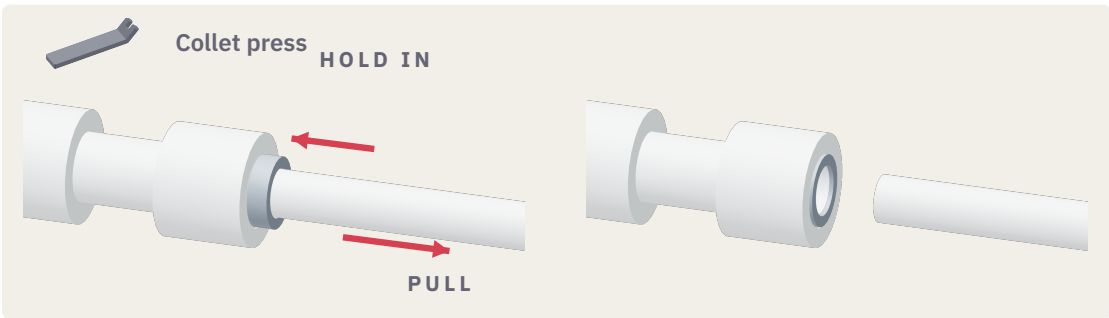

3 Shut off the cold water

Follow the line to its shut-off valve and close it. Run the cold tap until flow stops to release pressure. **Put a towel and cup under the joint.**

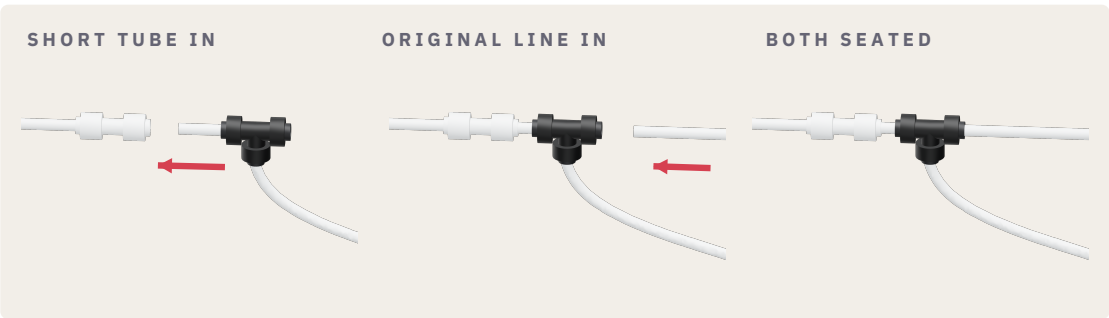

THIS WATER PATH: A 1/4 IN PLASTIC LINE IN A PUSH FITTING

4 Hold the ring in. Pull the tube.

Hold the fitting's release ring in with the **collet press** from your kit. Keep it pressed while you pull the existing tube straight out.

5 Push the supplied tee into place

Push the tee's short tube into the fitting you opened. Push the original tube into the tee's open end. **The long white run and its filter arrive attached.**

Braided hose instead? Use the white tee: install guide, pages 9-11.

6 Match each tube to its word

TAP	White, from the filter.
CO2	Red, from the cylinder.
SODA	Blue, from the faucet.
FLAVOR	Both black faucet tubes.

Either black tube fits either FLAVOR port. Click the faucet cable into the small square jack.

Remove the shipping caps. Push every tube fully home, then give it a gentle tug.

Keep the tubes long and coil the slack without kinks. Leave 1-5/8 in at both sides and 2-3/8 in behind the appliance.

THEN MAKE YOUR FIRST GLASS

1 Connect the cylinder

Keep the cylinder upright and closed. Hand-tighten the red tube's brass nut onto the regulator outlet. See install guide, p. 13.

2 Open, check, power

Open water slowly; watch joints for a full minute. Open CO2 and check the gas connections. Then connect the cord and plug into grounded 120 V.

3 Fill each flavor

On the enclosure display, choose **FILL**, pick a flavor and press **Start**. Invert one whole 14.8 fl oz bottle over the funnel. Let it drain. Repeat for the second flavor.

4 Let it chill. Then pour.

Allow about an hour for the first chill. Choose a flavor on the faucet display, put a glass underneath and press the faucet lever.
