P1: SHANK CAP. P2: BUNDLE CAP. OD: OUTER ARC.

ORIGIN P1; +X RIGHT, +Y UP. CHANNELS OPEN -Y.

FABRICATION AND FINISH

1. Laser-cut 316 stainless sheet, nominal 0.060 inch. Profile: UNDER-COUNTER-PLATE.DXF, at 1:1 in millimeters.

2. Remove all laser tabs and burrs. Finish BOTH FACES of the entire perimeter, channel walls, round caps and mouth rounds. Edge break 0.10 MAX.

3. Profile dimensions apply to the remaining cut land after finishing. Keep both channels fully open and within the stated tolerances.

4. Deliver flat: 0.25 MAX gap under its own weight on a flat inspection surface. Remove loose metal, chips and cutting fluid.
