

Connect the CO2.

Under-counter view. The customer's angle stop comes out of the wall with its outlet now empty. The existing supply line dangles disconnected beside it. The tee floats in the gap, with the 3/8" tube pre-attached to one outlet, extending across the drawing toward the appliance's back-panel water inlet. Gray rotation arrow on the angle stop. Two gray stub-arrows pointing inward at the tee's two open outlets. Gray arrow at the appliance water inlet.

placeholder

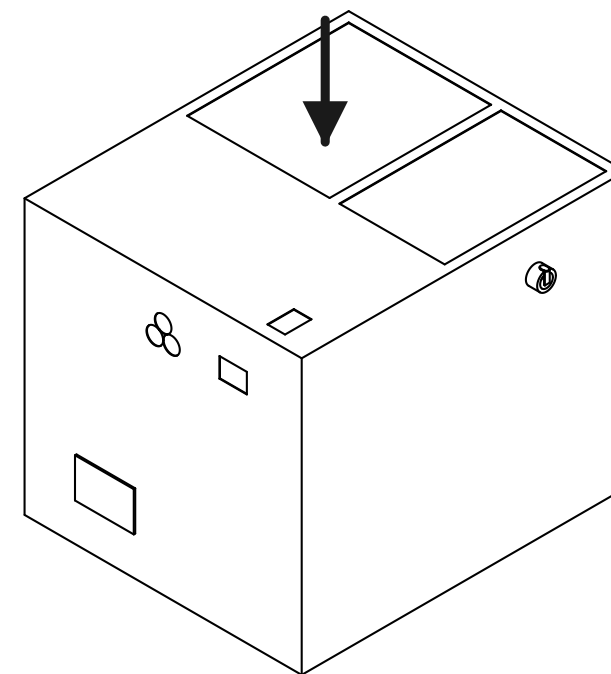

Tee into the water. Run the tube to the device.

Two foreground subjects side by side at the same scale: the CO2 cylinder with its top valve handle, and the angle stop with the tee on it and its shutoff handle. Red rotation arrow at the CO2 cylinder valve. Gray rotation arrow at the angle stop handle.

placeholder

Open the CO2. Open the water.

Empty a flavor into the hopper.
